INTRODUCTION

This illustrated Parts Catalog provides simple, positive identification of replacement parts for the Piper Model PA-28R-201/201T Arrow, manufactured by the Piper Aircraft Corporation of Vero Beach, Florida.

NOTE: DO NOT USE THIS CATALOG FOR RIGGING AND INSTALLATION PURPOSES.

1. The catalog is divided into fourteen major sections as follows:
 - a. Section I to XIII inclusive contains all replacement parts for the complete airplane. Each section is subdivided and each division includes an illustration and a parts listing.
 - b. Section XIV is the Miscellaneous Group. This group includes an illustration and parts list for the Placards and Exterior Stencils and a listing of the optional equipment kits, repair kits and special tools.
2. The following is a brief explanation of the columns in the parts lists: (Refer to EXAMPLE below).
 - a. The FIGURE AND INDEX NUMBER column indicates the illustration figure number and its part index number. EXAMPLE: (2-1), the 2 is the figure number and the 1 is the index number. The figure number appears only at the top of each parts list page.
 - b. The PART NUMBER column contains the identifying number of the replacement part and this number must be shown on all Parts Orders.
 - c. The CODE column is for the purpose of indicating special uses of the part. An explanation of the letter code used is shown on the grid (page) preceding each parts listing and pertains to that listing only.
 - d. The NOMENCLATURE column indicates the part name. This name must be shown on all parts orders.
 - e. The NO. REQ. (Number Required) column represents the total quantity of parts used per figure when the part is not indented and the quantity of parts used per assembly when the part is indented. The symbol AR listed in this column means As Required.
 - f. The SERIAL NUMBERS AFFECTED column indicates the part application by airplane serial number.

EXAMPLE					
Figure and Index Number	Part Number	Code	NOMENCLATURE	No. Req.	SERIAL NUMBERS AFFECTED
2-1	XXXXX-XX		DOOR ASSEMBLY - Baggage compartment	X	
-2	XXXXX-XX		* TUBE ASSEMBLY - Baggage door latch	X	
-3	XXXXX-XX		* * CLEVIS - Door latch tube assembly	X	
-4	XXXXX-XX		* * CLIP - Door latch tube assembly	X	

In the nomenclature column, the next higher assembly relationship of items covered is shown by the degree of indentation of each item and is indicated by an asterisk (*). One asterisk signifies one indentation, two signifies two indentions, etc. The example listing above is interpreted as follows:

If the DOOR ASSEMBLY(not indented) is ordered, it will include the three items indented under the DOOR ASSEMBLY.

If the TUBE ASSEMBLY(indented one space) is ordered, it will include the two items indented under the TUBE ASSEMBLY.

If you want only a CLEVIS or CLIP, you order only that item.

PIPER AIRCRAFT PA-28R-201/201T ARROW AIRPLANE PARTS CATALOG

INTRODUCTION

This illustrated Parts Catalog provides simple, positive identification of replacement parts for the Piper Model PA-28R-201/201T Arrow, manufactured by the Piper Aircraft Corporation of Vero Beach, Florida.

NOTE: DO NOT USE THIS CATALOG FOR RIGGING AND INSTALLATION PURPOSES.

1. The catalog is divided into fourteen major sections as follows:
 - a. Section I to XIII inclusive contains all replacement parts for the complete airplane. Each section is subdivided and each division includes an illustration and a parts listing.
 - b. Section XIV is the Miscellaneous Group. This group includes an illustration and parts list for the Placards and Exterior Stencils and a listing of the optional equipment kits, repair kits and special tools.
2. The following is a brief explanation of the columns in the parts lists: (Refer to EXAMPLE below).
 - a. The FIGURE AND INDEX NUMBER column indicates the illustration figure number and its part index number. EXAMPLE: (2-1), the 2 is the figure number and the 1 is the index number. The figure number appears only at the top of each parts list page.
 - b. The PART NUMBER column contains the identifying number of the replacement part and this number must be shown on all Parts Orders.
 - c. The CODE column is for the purpose of indicating special uses of the part. An explanation of the letter code used is shown on the grid (page) preceding each parts listing and pertains to that listing only.
 - d. The NOMENCLATURE column indicates the part name. This name must be shown on all parts orders.
 - e. The NO. REQ. (Number Required) column represents the total quantity of parts used per figure when the part is not indented and the quantity of parts used per assembly when the part is indented. The symbol AR listed in this column means As Required.
 - f. The SERIALNUMBERS AFFECTED column indicates the part application by airplane serial number.

EXAMPLE					
Figure and Index Number	Part Number	Code	NOMENCLATURE	No. Req.	SERIALNUMBERS AFFECTED
2-1	XXXXX-XX		DOOR ASSEMBLY - Baggage compartment	X	
-2	XXXXX-XX		* TUBE ASSEMBLY- Baggage door latch	X	
-3	XXXXX-XX		* * CLEVIS - Door latch tube assembly	X	
-4	XXXXX-XX		* * CLIP- Door latch tube assembly	X	

In the nomenclature column, the next higher assembly relationship of items covered is shown by the degree of indention of each item and is indicated by an asterisk (*). One asterisk signifies one indention, two signifies two indentions, etc. The example listing above is interpreted as follows:

If the DOOR ASSEMBLY(not indented) is ordered, it will include the three items indented under the DOOR ASSEMBLY.

If the TUBE ASSEMBLY(indented one space) is ordered, it will include the two items indented under the TUBE ASSEMBLY.

If you want only a CLEVIS or CLIP, you order only that item.

 - (7) Serial Numbers of the 1989 PA-28R-201T Turbo Arrow models are 2803001 and up.

SERIALNUMBER EXPLANATION

The Serial Number on the Manufacturer's Identification Plate is based on either a 3- or 4-set numbering system. In the 4-set system, the first set defines the Type Certificate Designation, the second set is the Model Year, the third set is the Model Code, while the fourth set is the Model Sequence Number (within a model year).

The 3-set system omits the model year* and begins a new sequence with 2803001. This new sequence continues without renumbering for a new year.
